

FELO's new concept electric motorcycle.

A new breed between the conventional motorcycle and scooter powerful, lightweight and stylish.

***Automatic torque system**

The ATS auto torque transition system developed by FELO, combined with the strong power output of the motor brings extraordinary acceleration and 88 high top speed when the S sport mode is activated.

Peak Torque: 58 n.m

"58n.m is the torque on the motor shaft, which is equivalent to the torque on the wheel of 336.4n m

FRAME

125kg ultra-light weight, surpassing other products at the same price range. Over 30% technology sharing with FELO's TT race bike. The precise and efficient ATS system increases the power efficiency up to 9%.

***TCS: Traction Control System**

When the vehicle is in a skidding condition, TCS can control the direction and obtain the best traction, improving the driving stability of the motorcycle.

The front and rear disc brake system assisted with single-channel ABS provide a better and safer braking performance.

In addition, with the TCS to double insure riding safety

Marketing Warranty: Battery warranty time is 8 years or 80,000 km (whichever occurs first), INP58P

lithium battery, safety level pack design. Smart Battery Management System for continuous security.

*The battery is waterproof 1 meter underwater for 24 hours and meets the IP67 waterproof level.

Live time vehicle status at your hand, linked to the vehicle data centre, enabling full control of the vehicle remotely and safely.
