THE WORLD'S FIRST ELECTRIC HYPER-SUV

The Lotus Eletre is the first all-electric hyper-SUV. It takes the core principles and Lotus DNA from more than 70 years of sports car design and engineering, evolving them into a groundbreaking new lifestyle car beyond all existing categories. Its bold design signals the start of a new era, while its Lotus characteristics remain clearly visible. The next-level aerodynamics and powerful electric motors make it capable of 0-100km/h in less than three seconds\*, while the pioneering technology and sustainable high-quality materials are bound to take every journey to a new level of premium.
