: บริษัท ยามาฮ่ามอเตอร์ จำกัด ประเทศญี่ปุ่น ผู้นำเข้าและจัดจำหน่ายโดย : บริษัท ไทยยามาฮ่ามอเตอร์ จำกัด

IMPORTED 100 % MADE IN JAPAN

ENGINE เครื่องยนต์

Engine type ชนิดเครื่องยนต์ 2-cylinder, 4-valves, 4-stroke, Liquid-cooled, DOHC **Displacement** ปริมาตรกระบอกสูบ

Bore & Stroke กระบอกสูบ & ระยะชัก 80.0 mm x 68.6 mm

Compression ratio อัตราส่วนกำลังอัด 11.5:1

Maximum power รอบเครื่องสูงสุด 54.0 kW (73.4 PS) @ 8,750 rpm Maximum torque แรงบิดสูงสุด 67.0 Nm (6.8 kg-m) @ 6,500 rpm

DIMENSIONS <u>ขนาด & น้ำหนัก</u>

Overall length ความยาว 2,070 mm Overall width ความกว้าง 705 mm Overall height ความสูง Seat height ความสูงจากพื้นถึงเบาะ 835 mm Wheel base ระยะห่างฐานล้อ 1,395 mm Minimum ground clearance ระยะห่างจากพื้นถึงเครื่อง 135 mm **Wet Weight** [including full oil and fuel tank] น้ำหนักรวมถังน้ำมัน 188 kg Fuel Tank capacity ความจุถังน้ำมันเชื้อเพลิง 13 L

CHASSIS ตัวกัง

Frame ชนิดของเฟรม Diamond

Front suspension system ระบบกันสะเทือน (หน้า) **Upside-down telescopic fork** Rear suspension system ระบบกันสะเทือน (หลัง) Swingarm (link suspension)

Front Travel ระยะยุบโช้ค (หน้า) 130 mm Rear Travel ระยะยูบโช้ค (หลัง) 130 mm

Front brake ระบบเบรก (หน้า) Hydraulic dual disc Rear brake ระบบเบรก (หลัง) Hydraulic single disc

Front tyre ยาง (หน้า) 120/70 ZR 17M/C(58W) Tubeless Rear tyre ยาง (หลัง) 180/55 ZR 17M/C(73W) Tubeless

Aerodynamic cowling and twin-eye face

You don't need to see the Yamaha logo to know that this stunning new Supersport is part of the legendary R-Series family. The lightweight full fairing with aluminum lower panels has been shaped by pure R-Series DNA, and features an aggressive twin-eye face with its M-shaped air duct and a powerful central LED headlight.

Fully-adjustable inverted 41mm front forks

The KYB 41mm Inverted front forks give a planted and confident feeling on racetracks and twisty roads. Featuring full adjustability for preload as well as rebound and compression damping – and equipped with a gravity cast upper triple clamp and forged aluminum lower triple clamp - this high-specification front end gives excellent controllability and precision.

High-torque 689cc CP2 engine

Delivering 73,4 PS @ 8.750 rpm, the 689cc CP2 engine of the R7 offers thrilling acceleration and instant throttle response. Its 270 degree crank gives an uneven firing interval that ensures a lively and exciting feel as the revs rise – and its linear torque output enables you to lay down the power efficiently for faster corner exits.

Features

A&S clutch for increased controllability

The R7 is the first CP2-engined Yamaha to be equipped with an Assist & Slipper (A&S) clutch that delivers smoother gear shifting and prevents engine over-rev and rear wheel hop during hard braking, resulting in more predictable and controllable handling when approaching corners. And this A&S clutch also offers a much lighter feel at the lever.

Lightweight frame fine-tuned for chassis rigidity

With a wet weight of only 188 kg, the R7 features a compact frame that makes it the slimmest bike in the R-Series family. Its balance of rigidity has been fine-tuned with an aluminum centre brace as well as by using tubing with varying tensile strengths – and these key features contribute towards the bike's outstandingly agile and responsive handling characteristics.
