

RANGE ROVER EVOQUE

RANGE ROVER EVOQUE

The all-new Range Rover Evoque. A Range Rover with an altogether different spirit. The most exciting vehicle in a generation. Bold and sophisticated in design. With clever technology that's innovative, relevant and always intuitive to use. Nothing else looks like it, feels like it, or drives like it. In fact, Range Rover Evoque is a quantum leap in the evolution of Range Rover design.

Unashamedly on-road with an all-new chassis, the vehicle provides an engaging blend of dynamic and sporty handling with impressive refinement. The Range Rover Evoque masters all surfaces and all weathers, using legendary Land Rover all-terrain technologies. It is smaller, lighter – the most efficient Range Rover... ever. A true Range Rover in compact form, a new class of SUV. Available in two distinct bodystyles. Range Rover Evoque Coupé, the compact premium crossover. And Range Rover Evoque, the five-door version with its sleek, striking coupé design and a more practical profile to suit specific lifestyle needs. The all-new Range Rover Evoque.

Range Rover Evoque's bold, assertive design is available in three distinct derivatives – Pure, Prestige and Dynamic – offering a tempting array of choices and technology.

Vehicle shown Range Rover Evoque Prestige in Firenze Red with optional 20 inch Sparkle Silver Alloy Wheels 'Style 6'

Unsurpassed interior luxury.
Pure contemporary craftsmanship.

The luxury of choice.
Beautifully crafted. Superbly designed.

A creative use of the latest materials complementing traditional materials.
Offering more colour and flair. Offering more opportunity for individual expression
as part of a personal journey.

Design

Superbly designed. Carefully created by Range Rover designers to give more opportunity for individual expression and to make every journey more personal. It is the true Range Rover experience on a compact scale.

There is a sumptuous Oxford leather wrapped interior, beautifully hand-finished with twin-needle stitching on Prestige and Dynamic Plus derivatives. And premium, soft-touch materials and grained leather on the Pure and Dynamic derivatives. And real metal finishers that are cool to the touch, tactile and a reminder of the interior's superior quality, plus a contemporary, clean treatment of interior surfaces and flush-fitting air vents.

There is also the choice of an optional full-size, fixed panoramic glass sunroof, cleverly engineered to maximise its length and width to create a sensation of space and light, as well as providing uninterrupted views of the surrounding environment. Importantly the toughened glass has a dark tint to protect occupants and the interior from the sun's rays.

Technology

Technology plays a key role at the driver's interface with the vehicle. The high-definition, eight-inch colour Touch-screen is easy to use with exceptionally clear, contemporary graphics.

Range Rover Evoque is packed with clever, relevant technology including state-of-the-art connectivity. This includes Bluetooth® for both hands free connection, with a compatible mobile phone, to the vehicle's in-built phone system and audio streaming for the enjoyment of personal music from a portable Bluetooth® device via the audio system. Essential connectivity for iPod, MP3 and memory sticks is also provided via direct inputs.

iPod is a registered trademark of Apple Inc., registered in the US and other countries.
The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under licence.

Range Rover Evoque can be enhanced with ambient LED mood lighting. This can be configured to suit personal tastes with a choice of five colours and a variety of brightness settings. To add a real sense of occasion automatic colour changes are activated when the driver chooses Dynamic mode on Terrain Response®, changing the ambient lighting to red.*

*Only available with Adaptive Dynamics

With its lightweight and more compact footprint, the Evoque offers the enthusiast driver quicker responses and greater agility. Available on Prestige and Dynamic models, Adaptive Dynamics with advanced MagneRide™ monitors vehicle movements at least 1000 times per second, reacting to driver or road inputs instantaneously to give greater control and minimise body roll, providing a balanced, flat ride. The system will even sense off-road conditions, and optimise damping accordingly.

Like every Range Rover vehicle, Range Rover Evoque optimises performance, capability and safety in all on and off-road conditions. It does this by employing a suite of innovative technologies including Terrain Response®, which adapts Range Rover Evoque's engine, transmission and electronic systems to maximise driveability, comfort and traction.

There are four Terrain Response® settings: General Driving, Grass/Gravel/Snow, Mud & Ruts and Sand. A fifth Dynamic setting is added when Adaptive Dynamics is specified. Other cutting-edge technologies include the Land Rover patented Hill Descent Control (HDC), Gradient Release Control (GRC) and Hill Hold as well as Dynamic Stability Control (DSC), Electronic Traction Control (ETC) and Roll Stability Control.

Range Rover Evoque's advanced lighting technology achieves outstanding performance as well as providing some of the vehicle's most striking signature design elements.

The innovative LED lighting systems are used to create the unique graphics of the front daytime running lights and complex 3D 'petal' design in the rear lamps.

Up front safety during night-time driving is also enhanced with the optional availability of adaptive Xenon headlamps. These optional headlamps have an adaptive feature to provide added illumination in tight bends and can be upgraded with Automatic High Beam Assist which detects light from oncoming traffic and switches automatically between high and dipped beams as appropriate.

Our Plan for Sustainability

The all-new Range Rover Evoque is the smallest, lightest and most compact Range Rover ever.

A compact footprint and sleek design help to minimise weight and improve aerodynamic performance, while delivering sporty, agile handling. It features a more economical range of both petrol and diesel engines. A four-cylinder diesel with the availability of stop/start technology. And an all-new, state-of-the-art, turbocharged four-cylinder Si4 petrol engine which gives six-cylinder performance and feel with four-cylinder economy.

State-of-the-art turbocharged four-cylinder engines

Diesel vehicles feature the latest 2.2 litre turbodiesel, available in two forms 190PS (SD4) and 150PS (TD4) plus a 150PS (eD4) version, to deliver superb torque, responsive performance and impressive refinement.

The Si4 petrol engine is a 2.0 litre engine in a lightweight all-aluminium unit with the latest direct-injection technology, advanced turbocharging and twin independent variable valve timing to help lower fuel consumption and CO₂ emissions by up to 20 percent compared with traditional larger capacity engines.

With the 2WD option, this is a Range Rover capable of delivering sub 129g/km of CO₂ emissions. It's an opportunity for more people than ever before to get into a Range Rover.

Advanced lightweight, sustainable materials

To reduce weight and improve fuel efficiency, Range Rover Evoque uses the most advanced lightweight materials. Aluminium, magnesium and titanium components contribute towards its gentler carbon footprint.

Carefully designed to maximise the use of more sustainable manufacturing materials, each vehicle uses approximately 16kg of recycled plastic and 21kg of natural and renewable materials.* Electric power-assisted steering (EPAS) also contributes to making Range Rover Evoque the most sustainable Range Rover model ever by reducing fuel consumption, and by eliminating the wasted energy in a conventional power steering system, EPAS further reduces CO₂ emissions.

Offering premium levels of luxury and performance, Range Rover Evoque is also a combination of efficiency and responsible design. This makes the vehicle one of the lightest users of resources in its class and reduces its impact on the environment throughout its lifecycle. This is a vehicle like no other. This is the remarkable, all-new Range Rover Evoque.

*Data based on manufacturer's estimate

Pure

Range Rover Evoque takes its inspiration directly from the LRX concept car which took the motoring press by storm and captured the public's imagination across the world. With its dramatic exterior design combined with Range Rover's signature interior architecture, Range Rover Evoque is the purest expression of that original concept. It's packed with clever, relevant technologies to provide a premium experience.

Pure features include:

- Grille in dark Atlas (Coupe) and Brunel (five-door)
- Waist finisher in high gloss black
- Tailgate finisher in dark Atlas (Coupe) and Brunel (five-door)
- Side fender blade in dark Atlas (Coupe) and Brunel (five-door)
- Bonnet louvres in dark Atlas (Coupe only)
- Body coloured mirror caps
- 17 inch Sparkle Silver Alloy Wheels 'Style 1'
- Satin Brushed Aluminium interior finisher
- Partial leather seats
- Oxford leather steering wheel.

Dynamic

A sports-orientated take on the Range Rover Evoque design theme but with a more assertive, athletic stance. Its muscular attitude is emphasised by strong design cues. The bold exterior, with unique bumpers, sills, grille and tailpipes, is twinned with a premium sports interior with leather seats and unique detailing. The dramatic slope of the roof is further highlighted with a sports spoiler and the availability of a contrast colour.

Dynamic features include:

- Grille in gloss black
- Dynamic front bumper
- Dynamic side sills
- Dynamic rear sport spoiler
- Dynamic rear bumper
- Dynamic exhaust with skid plate
- Tailgate finisher in gloss black
- Bonnet louvres in gloss black (Coupé only)

Sensational light and space

It's not just the range of interiors. It is the vast range of colour combinations that you can choose, including standout contrast colours for the roof. There are more personalisation options available than ever before. There's a panoramic roof that gives the interior a bright, airy quality whilst helping to keep out the sun's heat. An interior sunblind is also available to reduce light in the cabin on the brightest days.

Our plan for a sustainable future.

We take our responsibility to our planet very seriously, with an integrated and innovative approach for a sustainable business and lower carbon world. As a company we are committed to:

e_TERRAIN TECHNOLOGIES.
EFFICIENT POWER SYSTEMS; LIGHTWEIGHT STRUCTURES, REDUCED EMISSIONS

A joint £800m investment into new technologies designed to reduce CO₂ emissions and improve fuel consumption. We are targeting a 25 percent reduction in joint fleet average tailpipe CO₂ emissions within the next five years. Beginning with an intelligent Stop/Start system on Freelander 2 diesel manual, followed by Intelligent Power Systems Management (IPSM) with Smart regenerative braking on all Discovery 4, Freelander 2 and Range Rover vehicles, to the announcement of our new compact Range Rover Evoque, e_TERRAIN TECHNOLOGIES form a fundamental part of our carbon management plan.

SUSTAINABLE MANUFACTURING.
USING FEWER RESOURCES AND CREATING LESS WASTE

World class manufacturing facilities, certified to ISO14001 since 1998. As a company we are targeting a 25 percent reduction in operating CO₂ emissions by 2012, 25 percent in waste to landfill and 10 percent in water consumption, based off 2007 levels. Going forward we are measuring our total operating carbon footprint and setting targets to reduce it; since 2006 this integrated approach has included the carbon offset of all manufacturing assembly CO₂ emissions from our Solihull and Halewood plants. But it doesn't stop there. Every new vehicle is designed to be 95 percent recoverable and reusable – with 85 percent that's recyclable and a further 10 percent that can be used to generate energy.

CO₂ OFFSETTING. INVESTING IN RENEWABLE ENERGY, TECHNOLOGY CHANGE AND ENERGY EFFICIENCY PROJECTS

For every tonne of CO₂ emitted during the manufacturing assembly of all our vehicles, Land Rover invests in carbon reduction projects that reduce an equivalent tonne of CO₂ elsewhere. In addition, we enable our customers to offset their first 45,000 miles/72,000 km of driving in their new vehicles. We do this in the UK as well as countries in Europe, the Middle East and Asia. Independently administered by ClimateCare and governed by a body of climate change experts, CO₂ offsetting allows us to take action now, to reduce our impact on the environment as part of an integrated carbon management plan.

CONSERVATION AND HUMANITARIAN PARTNERSHIPS.
WORKING PARTNERSHIPS FOR CONSERVATION & SOCIETIES GAIN

Our vehicles are designed for purpose, so are used by conservation and humanitarian organisations worldwide. Working with our five Global Conservation partners and the International Federation of Red Cross and Red Crescent Societies (IFRC), Land Rover is proud to support the important work of the Royal Geographical Society (with IBG), The Born Free Foundation, Earthwatch Institute, Biosphere Expeditions and the China Exploration and Research Society.

IMPORTANT NOTICE: This publication is intended for international usage and whilst Land Rover take the utmost care in ensuring that all details in the publication are correct at the time of going to press, we are constantly striving for improvement and therefore reserve the right to alter specifications and equipment without notice. Details of specifications and equipment are also subject to change to suit local market conditions and requirements, and not all products are available in every market. Some vehicles are shown with accessories or optional equipment fitted.

All Land Rover Approved Accessories fitted by a Land Rover Dealer within one month or 1,600 kilometres/ 1,000 miles (whichever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation. All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Dealer who will be pleased to advise you on current specifications and any query you may have. Distributors and Dealers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Dealer. Distributors and Dealers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.
